PROFESSIONAL SUMMARY

BCA student skilled in data analysis, visualization, and problem-solving using SQL, Python, Excel, and Tableau. Passionate about extracting insights from data and building data-driven solutions, with an interest in modern technologies.

EDUCATION

Bachelor of Computer Applications <i>Amity University, Uttar Pradesh</i>	2023 – 2026 CGPA: 8.63
Dharmdev +2 H/S Sher, Gopalganj <i>Class XII</i>	BSEB 82.2%

TECHNICAL SKILLS

Languages: Python, C++, SQL (PostgreSQL), JavaScript, HTML/CSS
Data Analytics & Visualization: Tableau, Excel, Pandas, Matplotlib, Data Cleaning, Exploratory Data Analysis (EDA)
Frameworks & Libraries: Tailwind CSS, React, Next.js
Tools: Git, GitHub, VS, AWS, Code
Version Control & Deployment: GitHub Actions, GitHub Pages

PROJECTS

Global Layoffs Data Analysis & Visualization System | Excel, SQL, Tableau

- Analyzed global layoffs data using MySQL and Tableau.
- Cleaned and transformed raw datasets using SQL, CTEs, and window functions.
- Performed EDA to identify industry, company, and country-wise layoff trends.
- Built interactive Tableau dashboards with KPI metrics, maps, and trend analysis.
- Generated insights on workforce reduction patterns and economic impact.

MovieLens Data Analysis | Python(Pandas,Matplotlib,NumPy), Jupyter Notebook , Anaconda

- Cleaned and pre-processed a large movie dataset by handling missing values, duplicates, and inconsistencies.
- Performed exploratory data analysis to identify the most frequent genres and highest-voted categories.
- Analyzed popularity metrics to determine the most and least popular movies along with their genres.
- Examined yearly trends to identify the year with the highest number of film releases using Python (Pandas, NumPy, Matplotlib).

EXPERIENCE

Student Volunteer & Technical Club Head <i>Amity University Summer School (AUSS)</i>	June 2024 – July 2024 Noida, India
- Conducted 5+ hands-on workshops on Web Development and coding for school students. - Led demo sessions and mentored 20+ students to spark interest in emerging technologies. - Coordinated with faculty and club members to prepare course content and deliverables.	
Intern Project: Wealth Management System <i>Saral Startup School</i>	January 2025 – May 2025 Remote
- Developed frontend features using React and modern UI libraries. - Collaborated with the database team to understand DBMS concepts and data flow. - Worked on financial management modules including Goal Setting and Expense Tracking.
